

Safety

Thanks to its smart safety management, the P-MATIC anticipates and reacts autonomously to its direct environment. Advanced obstacles' detection provides real time speed adjustment to enhance the productivity while offering the utmost safety.

Performance

The unique infrastructure-free geoguidance system makes the solution flexible and scalable. Stand alone or within larger fleets of robotic trucks, the P-MATIC can easily interact with the customer's environment (doors, conveyors..) and even interface with WMS/ERP. The P-MATIC will always deliver the optimal drive speed to achieve the maximum throughput.

Comfort

The P-MATIC is natively designed to work in a shared environment with people. The user-friendly interface provides all needed controls & information at a glance. Moreover, the dual driving mode makes the P-MATIC intuitive to switch automatic/manual.

Reliability

Linde Material Handling

Fully integrated in the warehouse product range, the P-MATIC benefits from all Linde quality standards, and the robust "DRIVEN BY BALYO" navigation technology. Always available, the P-MATIC will support your business 24/7 while offering significant costs-savings.

Productivity

Efficiency at work, efficiency in servicing. With a computerized & remote diagnostic system, combined with predictive maintenance program, the P-MATIC remains available at any time.

Features

Driving system

- → Standard truck converted into a robotic truck
- \rightarrow Dual driving mode automatic/manual
- → Navigation laser, safety front scanner, 3D camera, embedded computer, emergency stop buttons, light and sound warning indicators

Smart safety

- → Real time speed-adaptive detection fields
- → Dynamic cornering detection fields
 → Autonomous decision-making
- capability with 3D camera
- → Natural cohabitation with operators and other trucks
- → Pallets or obstacles detection thanks to the rear laser scanner

User interface

- \rightarrow 7" LCD touch screen
- → Robotic truck, battery and system status
- $\rightarrow~\mbox{Real}$ time task management and report
- → Intuitive path localization
- → Service mode with PIN access → Log extraction via USB

Linde Material Handling GmbH, Postfach 10 01 36, 63701 Aschaffenburg, Germany Phone +49.60 21.99-0, Fax +49.60 21.99-15 70, www.linde-mh.com, info@linde-mh.com

Geoguidance navigation

- → Innovative infrastructure-free technology (no reflector)
 Relies on existing structural features (walls, columns, racks...)
- \rightarrow Real time mapping and localization
- → Seamless integration in existing layouts, gradual extension or global deployment

Operations management

- \rightarrow Trailers transport management
- → Stand alone or WMS/ERP directed
- $\rightarrow\,$ Supervisor software for task and smart traffic management
- → Various task triggers: call buttons, sensors, PLCs, Supervisor software ...

Subject to modification in the interest of progress. Illustrations and technical details could include options and not binding for actual c tions. All dimensions subject to usual tolerances.
